

Transforming an industry burdened by inefficiencies and actively seeking change.

ZAPER.AI

Practical AI solutions for today's challenges of construction industry, while ensuring wins for tomorrow

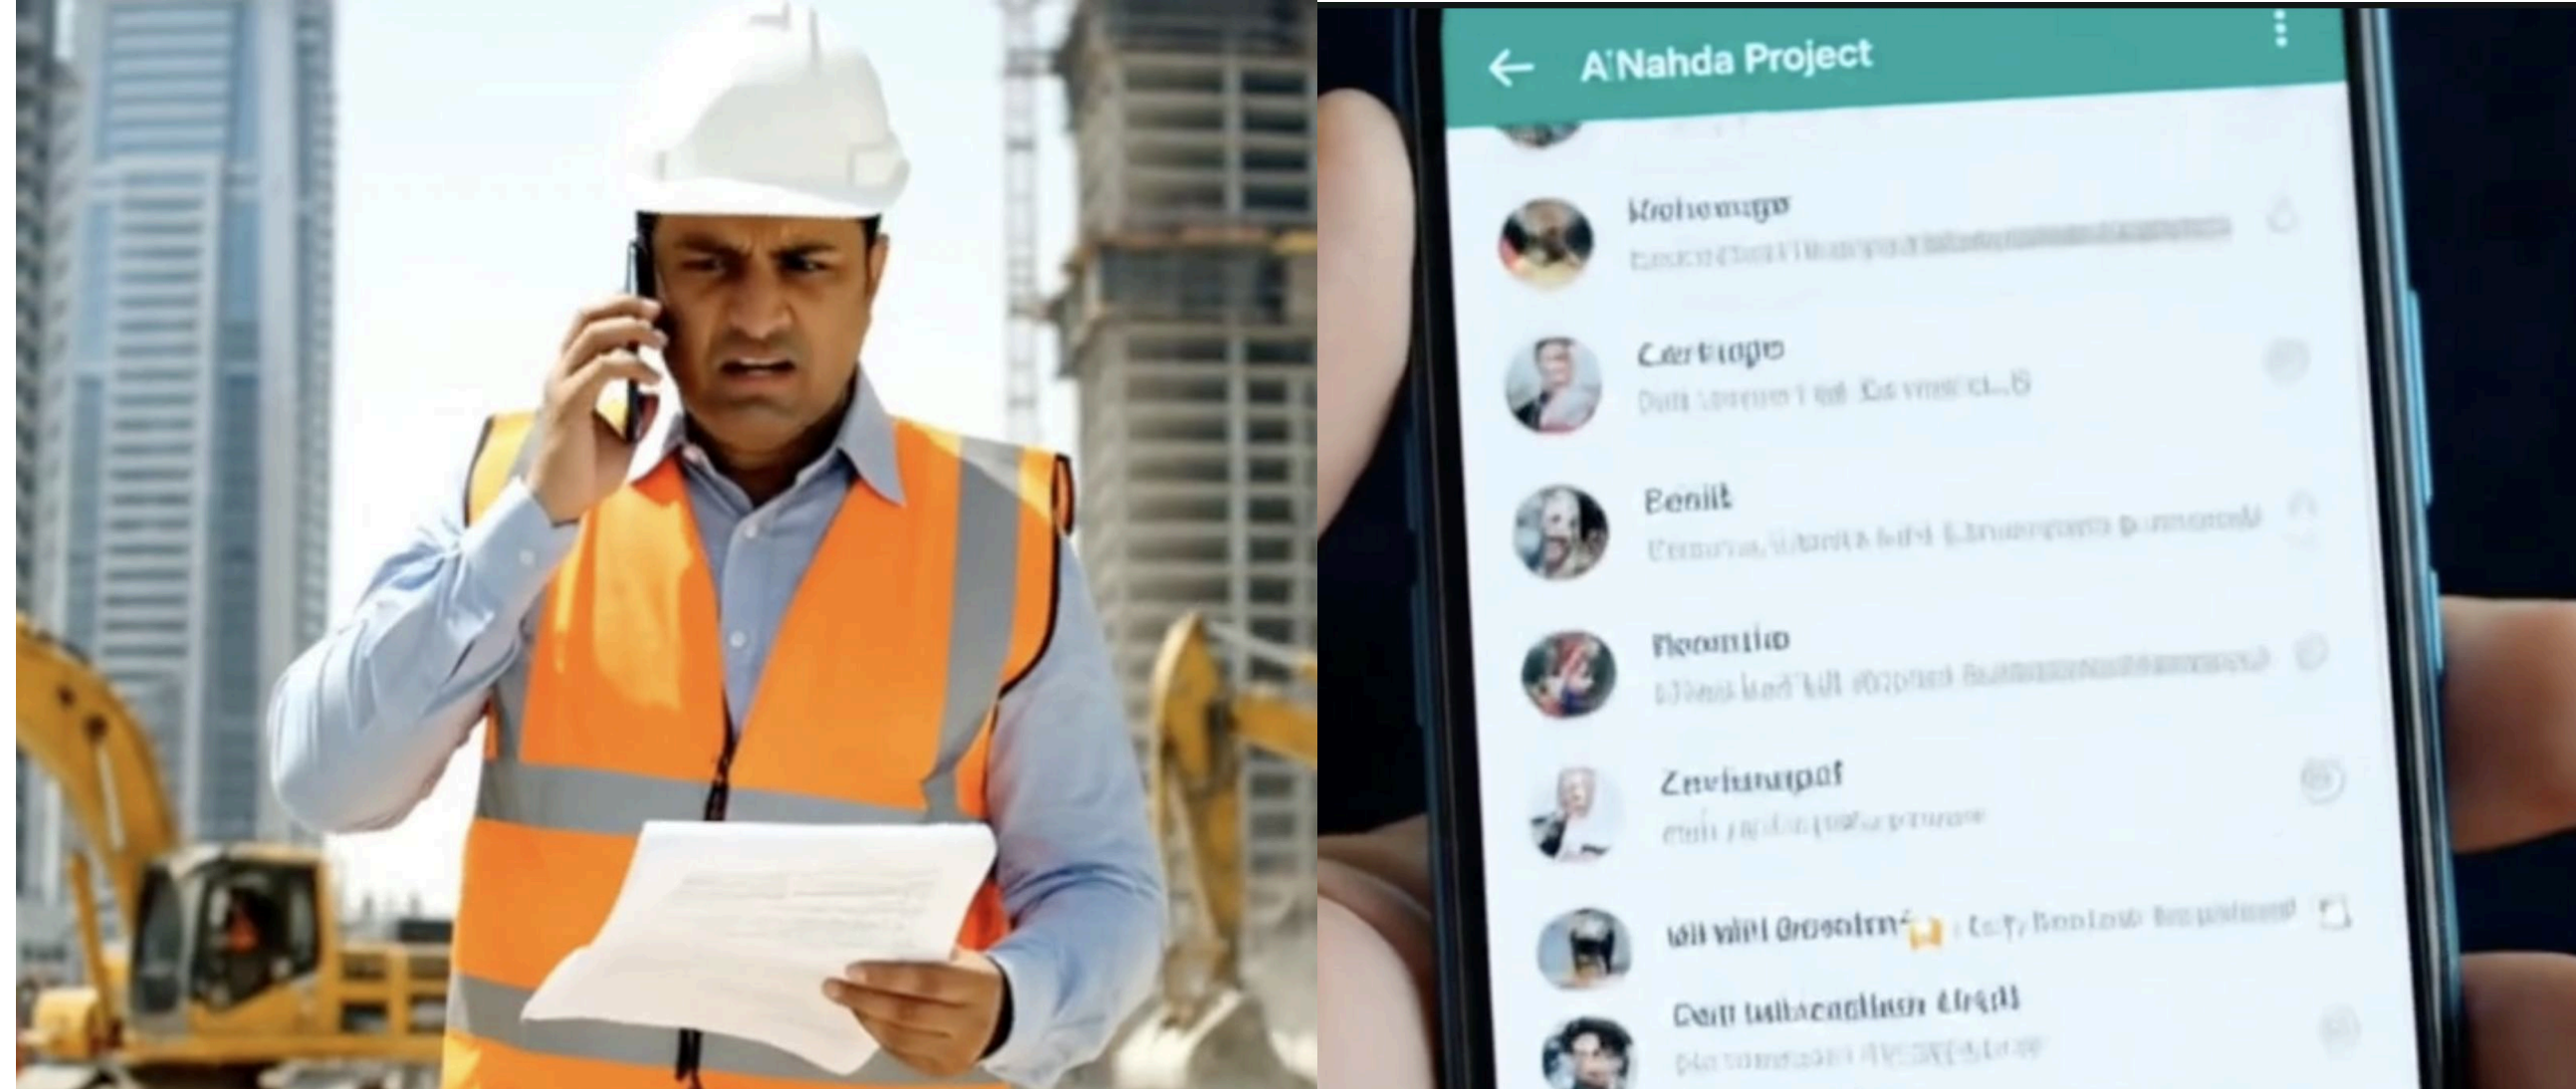

- Founded and incorporated in Late 2024 as a Delaware C-Corp - with HQ in Austin, Texas, US and with a strategic office in Dubai
- Positioned for the sectors projected to grow by \$26.68 billion within a \$1.46 trillion TAM by 2032.

Leading Problem :

Information syncing between project site & office is broken, unreliable & delayed

Serious Impact :

- Planning blindness
 - Cost overrun
 - Employee attrition
 - Training & skill gaps
 - Compliance issues
 - Delays & rework
 - Sustainability & safety
-
- 90% of projects experiencing budget overruns
 - Critical labor shortage of 500,000 workers by 2026
 - Rising costs increase expenses by 5-7% annually.
 - 30% of construction projects suffering delays.

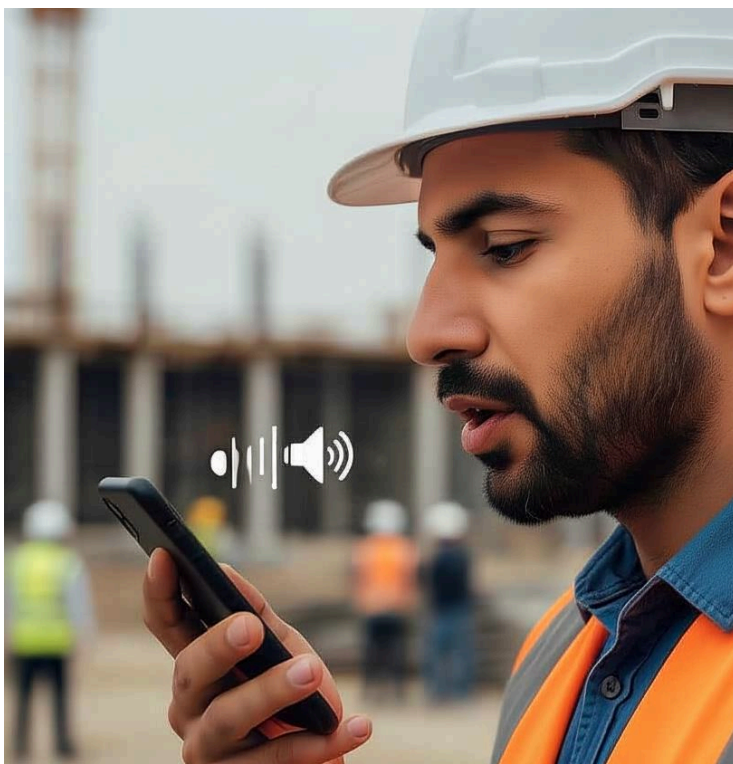

Non digitized, Manual chasing & follow up, asynchronous, error prone, untraceable

Before Zaper, Workforce struggled to use tech to report field data

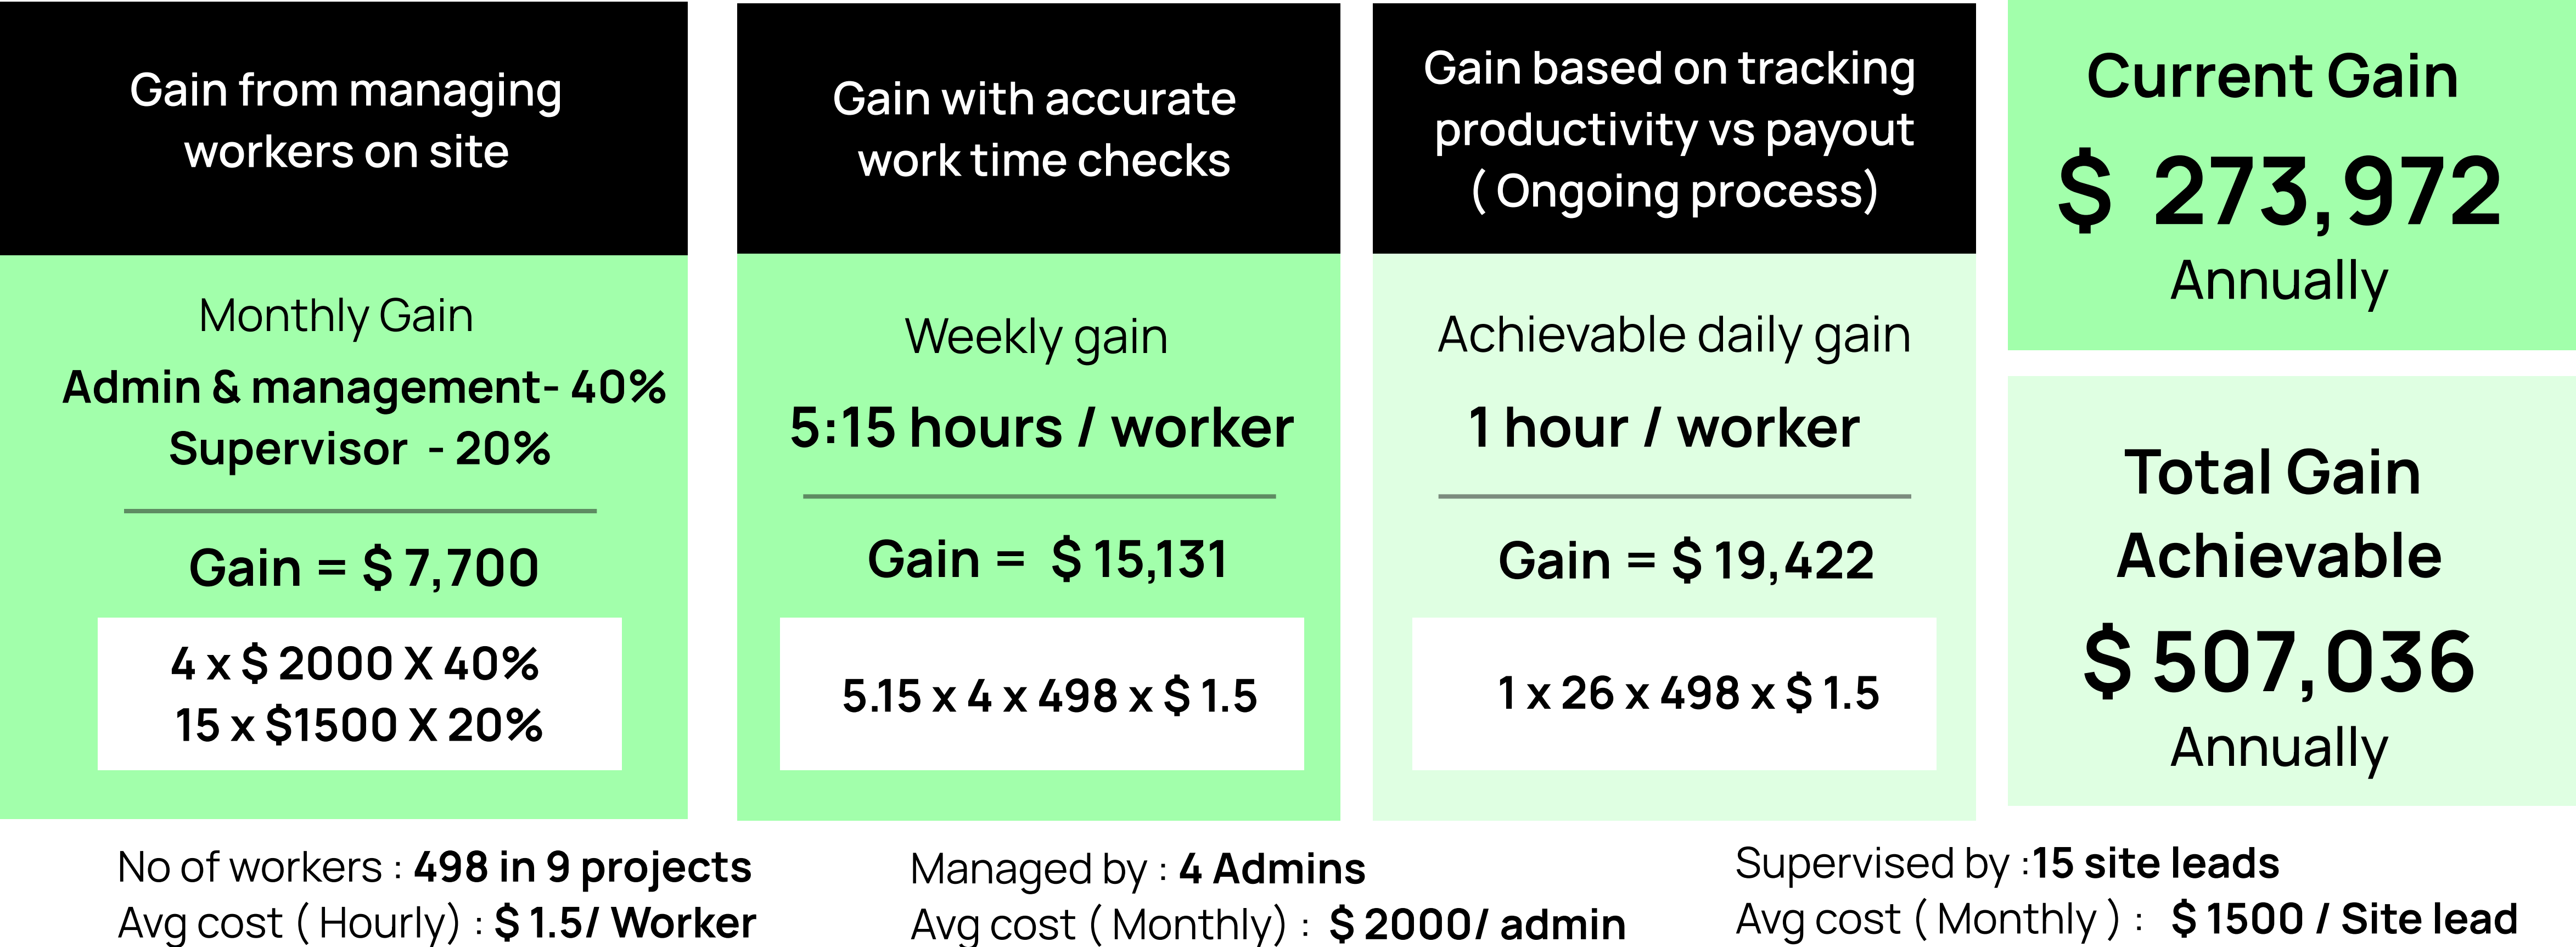

- Language & educational proficiency
- Complex systems requiring tech learning
- Large time & amount of data to report
- Limited knowledge of Industry formats & reporting standards
- Dynamic operational scenarios

Strong Proof

16.53% Savings in Manpower cost

In a recent live deployment (MEP contractor with 500+ workforce, 9 projects) by controlling leakage within one month translating to **~1.3% increase in project margins.**
